Business Overview

Industry: Luxury Real Estate

Business Type: Local Service

Location: Dubai

Summary: EQT is a private luxury real estate brokerage in Dubai specializing in exclusive off-market sales of high-end properties in Palm Jumeirah, Al Barari, and Jumeirah Islands.

Services: Luxury home buying and sales, Off-market property access, Private investment portfolio building, Discretionary real estate valuation

Critical Issues (2)

✗ Favicon (Branding)

No favicon found - Checked common favicon locations

How to fix: Add a favicon.ico file to your site root. This appears in browser tabs and bookmarks.

✗ LCP (Mobile) (Core Web Vitals)

Poor LCP - 11.4s (should be < 2.5s)

How to fix: Optimize your largest visible element (usually hero image or heading). Use lazy loading, optimize images, and improve server response time.

Warnings (13)

■ Meta Tags (On-Page SEO)

Some meta tags need attention - Meta description too long (> 160 chars)

How to fix: Add or fix the missing/problematic meta tags to improve search visibility.

■ GSC DNS Verification (Search Console)

No GSC verification in DNS - This may be verified via other methods

How to fix: Verify your site with Google Search Console using DNS TXT record for the most reliable verification.

■ GSC Meta Verification (Search Console)

No GSC verification meta tag found - This may be verified via other methods

How to fix: If not verified via DNS, add the GSC verification meta tag to your homepage.

■ Social Media Links (Social)

Limited social media presence - Only found: Instagram

How to fix: Add links to more social media profiles (Facebook, Instagram, LinkedIn, Twitter/X, YouTube) to build trust and expand reach.

■ Content Length (Content)

Content could be longer - Only 417 words (aim for 500+)

How to fix: Add more valuable content to your homepage. Aim for at least 500 words to provide enough context for search engines.

■ Clickable Contact Links (User Experience)

Missing clickable phone link - Only email link found

How to fix: Add a clickable phone link using tel: for better mobile user experience.

■ Next-Gen Images (Performance)

Some images use old formats - 11 of 23 images not using WebP/AVIF

How to fix: Convert remaining JPG/PNG images to WebP or AVIF for smaller file sizes and faster loading.

■ Google Business Profile Link (Local SEO)

No Google Business Profile link - No link to Google Maps or Business Profile found

How to fix: Add a link to your Google Business Profile. Use your g.page short link or direct Maps link to help customers find you.

■ Google Maps Embed (Local SEO)

No Google Maps embed - No embedded map found on homepage

How to fix: Embed a Google Map on your contact page or footer to help customers find your location easily.

■ Local Business Schema (Local SEO)

No local business schema - Missing LocalBusiness structured data

How to fix: Add LocalBusiness schema markup with your NAP, hours, and service area to help Google understand your business.

■ Performance Score (Mobile) (Performance)

Performance needs improvement - Score: 65/100

How to fix: Optimize images, reduce JavaScript, enable caching, and use a CDN.

■ Performance Score (Desktop) (Performance)

Performance needs improvement - Score: 88/100

How to fix: Optimize images, reduce JavaScript, enable caching, and use a CDN.

■ LCP (Desktop) (Core Web Vitals)

LCP needs improvement - 2.2s (should be < 2.5s)

How to fix: Optimize your largest visible element (usually hero image or heading). Use lazy loading, optimize images, and improve server response time.
